PROGRAM STRUCTURE

60+ hours lectures, mentored session with hands-on training, structure as follows:

WEEK 1/2	Network & HW/SW fundamentals
WEEK 3/4	Infrastructure products and services
WEEK 5/6/7	The world of applications
WEEK 8/9/10	Cloud Services
WEEK 11/12/13	Project Management Fundamentals

PROGRAM BENEFITS

- ★ Hands on, and with real world examples, the most commonly needed/used concepts, tasks, techniques, skills and procedures that every IT consultant needs to have as their foundation. Hopefully giving candidates not only skills but also the confidence wisdom and background knowledge that will allow them to be much more useful in whatever jobs, projects or further education they may wish to undertake.
- ★ To take things to the next level, and make an impression on the international market, bringing, recognition and pride for Pakistan, and of course lots of revenue.

INSTRUCTOR PROFILE MR NADEEM BUTT

- ★ The instructor has studied Electrical (Telecommunication) engineering from MCS, further studied Networking at MicroTech, London. He had continuous employments since 1995 in mostly UK based companies, and worked on different large and cutting edge projects in many countries, including UK, USA, Ireland, Austria, Sweden, Germany, Switzerland and Belgium. The instructor has official certifications from Sun Microsystems in system administration and many other infrastructure technologies e.g. HW Clusters, Sail point Inc and CISSP certification. Moreover, he has a good experience of Sun Microsystems teaching in their global training wing known as Sun Educational Services.
